The references cited in the Information Disclosure Statement of 10 November 2003 having a line drawn through them since their English language equivalents were considered.

JP 62-277488 has been considered with respect to the English abstract.

JP 3246386 has been considered with respect to the relevancy given in the specification.

The JCPDS powder diffraction file is illegible, thus it has been considered with respect to the relevancy given in the specification.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Reference number 15 in figures 9A and 9B. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1755

Claims 1-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. patent 4,093,890.

Examples 1-6, 15-19 and 21-34 all teach compositions that fall within the formulas of claims 1-7, 20 and 21. Examples 7 and 8 teach compositions that fall within the formulas of claims 8-19 and 22-25. The reference clearly teaches the claimed oxide and phosphor.
